CSU Cool-Shot Ultra

Performance Enhancer for Vehicles A/C System with R12 - R134a & R1234yf

What is it?

COOL-SHOT ULTRA is a synthetic catalyst that improves the efficiency of Air Conditioning Systems, reducing CO_2 emissions. Errecom laboratories have been increasing their own Ultra collection: **COOL-SHOT ULTRA** formulation has been actually reduced to only 6 mL universal dose for all vehicle A/C Systems.
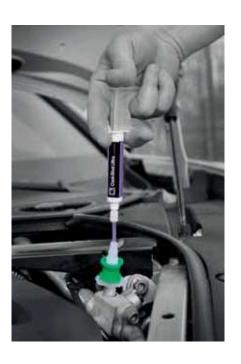

How does it work?

COOL-SHOT ULTRA is composed of two catalysts and a lubricating agent which enable the Air Conditioning systems to work at maximum efficiency: only 6 mL of product to eliminate the Oil Fouling phenomenon and to restore the cooling capacity of vehicles A/C Systems back to its original conditions.

Benefits:

✔ New advanced formula, less product in the System. ✔ Universal Dose for Vehicles A/C Systems. ✔ It restores the cooling capacity of Vehicles A/C Systems back to its original conditions. ✔ It improves coil heat transfer up to 76%. ✔ It increases cooling capacity by 30-40%. ✔ It delivers colder vent air (approx 2-3 °C) faster. ✔ It increases of 62% the lubricity of Compressor Oil. ✔ It reduces Compressor Friction, with a consequent decrease of vibration and noise. ✔ It Extends System life by 70-80%. ✔ It reduces annual maintenance costs by approx 20%. ✔ It reduces CO_2 emissions. ✔ Visible to any UV Lamp. ✔ Compatible with all Refrigerant Gases, including R12, R134a and R1234yf.
